COZMOZE   Jul.2012 – Nov.2014
Project Manager/ R&D Engineer
Cozmoze is a startup company that founded in 2012 in Paris. The main project of the company, is a web application which is similar to LinkedIn in the domain of art. I joined in this team as an intern, in charge of the backend development with a designer and a frontend intern in different projects and do something about the project management. After my internship in this company, I joined in COZMOZE project team with 5 people as a R&D Engineer.

- Publish the new version of the application
- In charge of the development of Presentation Layer and Business Layer
- Coordinate the development works in 3 teams (Analyze requirements, risking evaluating, making development planning and follow the development schedules)
- Provide the training to other interns
- SEO
- Deploy the Project
- Import the contacts to the project, base on the API of Yahoo!, Gmail and Window Outlook
- Implement the global search function, base on Lucene
- Develop the Backoffice of the web application
- Validation of the function, and fix the bugs
- In charge of the development of all the module and plug-in of WordPress and Prestashop
- In charge of the cutting and integration of the WordPress and Prestshop template file
- Development of JavaScript/jQuery
